

Trainee Task Sheet

Real-Time Project 01 — Trainee Management System

Build a simple system to manage Deshmukh Technologies trainees. Start with Trainee CRUD only.

OPEN TASK

Task 01 — Trainee CRUD

STACK

Python · FastAPI · MySQL

TEST

Postman

UPLOAD

GitHub

One task. Five APIs. Then stop.

INTERNAL TRAINING

DOCUMENT

TMS Task Sheet

VERSION

1.0

PROJECT

Real-Time Project 01

OWNER

Deshmukh
Technologies

01 Purpose

Build a simple system to manage Deshmukh Technologies trainees.

02 Technology

Python

FastAPI

MySQL

React

Git & GitHub

Postman

Task 01 uses Python, FastAPI, MySQL, Postman, and GitHub. React comes later.

03 Main features

Area	What it does
Login	Admin, Mentor, Trainee
Trainee management	Add, view, edit, deactivate
Batch management	Create batch, assign trainees, assign mentor
Attendance	Present, Absent, Leave
Tasks	Create, assign, submit, review
Performance	Evaluation, feedback, progress
Dashboard	Total trainees, attendance, pending tasks, performance

Do not build all of this now. Start with Task 01 only.

04 Task 01 — start here

PYTHON

FASTAPI

MYSQL

TRAINEE CRUD

POSTMAN

GITHUB

No React. No login. No dashboard.

05 First APIs

```
POST    /trainees
GET      /trainees
GET      /trainees/{id}
PUT      /trainees/{id}
DELETE   /trainees/{id}
GET      /health
```

GET /health returns { "status": "ok" }.

MySQL database: dttp_tms

```
CREATE TABLE trainees (
  id INT PRIMARY KEY AUTO_INCREMENT,
  full_name VARCHAR(120) NOT NULL,
  email VARCHAR(190) NOT NULL UNIQUE,
  phone VARCHAR(20),
  status VARCHAR(20) NOT NULL DEFAULT 'ACTIVE'
);
```

DELETE /trainees/{id} sets status = INACTIVE. Do not remove the row.

POST /trainees example:

```
{
  "full_name": "Rohan Deshmukh",
  "email": "rohan.deshmukh@example.com",
  "phone": "9876543210"
}
```

Success **201**. Duplicate email **409**. Missing id **404**.

Postman collection: docs/tms/DTTP-TMS-Task-01.postman_collection.json

06 First deliverable

Working Trainee CRUD API connected to MySQL and uploaded to GitHub.

☐ All five endpoints work in Postman

☐ You can see the row in MySQL

☐ Code is on GitHub (no passwords in Git)

Then wait for the mentor before Task 02 (Login).

DTTP · REAL-TIME PROJECT 01 · TMS

Start with Trainee CRUD. Then stop.

Python. FastAPI. MySQL. Postman. GitHub.

Learn. Build. Solve. Review. Deploy. Grow.
